The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/589,414	<b>Applicant(s)</b> TAKADA, AKINARI	
	<b>Examiner</b> JASON COLLINS	<b>Art Unit</b> 2833	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

### **DETAILED ACTION**

1. The new specification filed 6/30/08 is appreciated and has been entered.

#### ***Claim Rejections - 35 USC § 103***

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-7, 9-11, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ihara et al.

The timepiece of Ihara comprises a receiving means 1C, a timekeeping means 1E, a display means 2, a control means (the connection between the processor 1E and the display 2), an external input means 1M, and a storage means 1E. Different first S22 and second S24 receiving methods are established. Ihara does not specify whether these receiving operations are time-programmed or forced. However, both methods are well known and commonly used (both separately and sequentially) in radio controlled time pieces. These broad terms, in fact, describe all receiving operations. Therefore, it would have been obvious to have the receiving operations of Ihara be of these types. In regard to claim 2, it is noted that the local station is set to be used with the first receiving method (paragraph 28); given different distances and other conditions, it is inherent that the receiving success would be different from different stations.

#### ***Allowable Subject Matter***

4. Claims 8 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

5. Applicant's arguments filed 6/30/08 have been fully considered but they are not persuasive. Applicant argues Ihara does not disclose varying the number of types of standard radio wave signals which a receiving means tries to receive. However, in Figure 2 there are two signals which are attempted to receive, and in Figure 3 there are three stations which are attempted to receive. Ihara also discloses a feature to save power in several paragraphs including [0015].

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
